

# DHEERAJ YAMPATI

+1(571) 373-6664 | Fairfax, VA | dheerajyampati@gmail.com

## EDUCATION

George Mason University, Fairfax, VA

Graduated Dec 2025

Bachelor of Science in Computer Science

Relevant Coursework: OS, Software Engineering, Secure Programming, Computer Graphics, Autonomous Robotics, AI, Machine Learning, Cloud Computing (AWS), DSA, Design and Analysis of Algorithms

## SKILLS

|             |                                                                               |
|-------------|-------------------------------------------------------------------------------|
| Programming | Java, Python, C/C++, SQL, JavaScript (React/Next.js), Bash                    |
| Data        | MySQL, ETL pipelines, Apache POI, Pandas, Data Modeling, Weaviate (Vector DB) |
| Cloud       | AWS (EC2, S3, Glue, Athena, QuickSight), MS Graph API (OneDrive/Outlook)      |
| ML/AI       | Scikit-learn, Embeddings (bge-m3, Llama 3, Mistral), RAG Architectures        |
| Tools       | Spring Boot, FastAPI, JavaFX, Git/GitHub, Maven, Postman                      |

## EXPERIENCE

ELINT PRO Solutions

Sep 2025 – Present

Software Engineering Intern

Waxhaw, NC (Remote)

- Built HRMS modules for onboarding, payroll automation, and leave tracking using Java Spring Boot and MySQL.
- Implemented secure REST APIs with role-based access (JWT), improving data consistency across HR dashboards.
- Optimized SQL queries and added lightweight caching for frequently accessed endpoints to reduce response times.

VSoft Consulting

Jun 2025 – Aug 2025

Machine Learning Intern

Hyderabad, IND

- Built AWS data pipelines (S3, Glue, Athena, QuickSight) to process and visualize client datasets.
- Created internal AI tools by building RAG pipelines with Weaviate, bge-m3 embeddings, and Mistral/Llama 3, enabling document search and summarization.
- Developed a Spring Boot Excel bulk-upload pipeline with MySQL/JPA and Apache POI, automating validation.
- Led daily scrums and presented sprint progress to managers and investors, ensuring on-time delivery.

Think Analytix

Jun 2024 – Aug 2024

Software Engineering Intern

Irving, TX (Remote)

- Built full-stack features for internal dashboards using React, FastAPI, and PostgreSQL.
- Developed and improved REST APIs for profile management, search, and filtering.
- Added validation, error handling, and small UI improvements to streamline recruiter workflows.

Apex Sky

Jan 2023 – Present

Co-Founder

Fairfax, VA

- Co-founded the company; defined product vision and business strategy while validating market opportunities.
- Engaged with professors, CEOs, and senior leaders for expert feedback; iterated on go-to-market plans.
- Pitched the roadmap to potential investors and managed stakeholder communications.

## PROJECTS

**Microsoft ChatBot App.** Built a chatbot that connects to Outlook and OneDrive using the Microsoft Graph API to help users find and summarize emails and documents. Designed the backend with FastAPI, used bge-m3 embeddings and Weaviate for semantic search, and integrated Mistral and Llama 3 to generate natural, context-aware answers.

**TaskFlow – Full-Stack Team Productivity App.** Built a full-stack task management app using React, FastAPI, and PostgreSQL, with JWT auth and WebSocket support for real-time task updates. Containerized with Docker and deployed on AWS to provide a fast and collaborative team workflow platform.

**Immigration Processing System.** Developed a full-stack JavaFX + MySQL application for managing petition workflows in sprints. Implemented approver dashboards, DAO layers, and MVC-based UI logic as part of a semester-long software engineering project.
